

ARTWORK DELIVERY SPECIFICATIONS

For a smooth processing of your order, the supplied artwork meets the following specifications:

GENERAL

- Delivery by [e-mail](#), on CD or DVD.
- Set the cutting line or cutting die in the support colour (100M) and name the colour CUT.
- Set the cutting line to overprint and give the correct dimensions.
- Indicate the cover white and the spot varnish as a separate support colour.
- Depending on the artwork, grid 54 (133 lpi) or grid 60 (154 lpi) is used.
- Dot shape is circular.

LAYOUT

- Preferably in HIRES-PDF.
- Deliver file(s) in CMYK + PMS colours, remove all non-used colours.
- Scans at minimum 300 DPI, save as TIFF/EPS and, if possible, add the original scan.
- Start the raster percentage from 1% (never from 0%).
- Convert all text into outlines
- Lines should have a thickness of at least 0.5 PT
- Trapping: 0.5 PT
- Bleed should be a minimum of 3 MM.
- White text or objects: coloured up as non-transparent
- All text: no smaller than 4 PT.
- Keep objects or text \pm 2mm from the cutting line.
- If possible, please also deliver colour print and colour-separated prints.
